

# BEST ROLLING DOORS GRILLS

Quality Rolling Grille Doors

Ideal for Store Fronts, Shopping Malls, and Entranceways.

Provides Security While Maintaining an Open Appearance.

Grille Curtains Are Solid 5/16" Hot Dipped Galvanized Steel Rods with Vertical Aluminum Links.

Materials: Galvanized steel, Aluminum, Stainless Steel.

Best Rolling Doors Grills are designed for security and ease of operation. The superior construction and quality materials utilized by Best guarantee a long life for all of our steel grille doors with limited maintenance. Our trouble-free coiling grille doors are built to order to fit your opening size. All of Best's grilles have been proven for use on thousands of installations where coiling grilles are required for business and industry.

Best Rolling grille curtain consists of solid 5/16" hot-dipped **galvanized** steel rods covered with Aluminum, PVC or Stainless steel sleeves connected with vertical aluminum links. Available industrial grille patterns include either the standard 9" brick pattern or an optional 6" straight pattern. For more options contact factory. The grill option maintains security and visibility features while allowing air to circulate. Guides are construction consist of extrude aluminum or roll-formed galvanized steel.

Coiling grille doors can be operated manual push-up, manual chain hoist or motor operated.

Best security grille includes a 24 gauge galvanized or paint-primed hood. For minimal obstruction of interior space, the roll up grille stores in an overhead compact coil.

Locking options include Hasp-pin type for use with padlocks, optional L, mortised cylinder or slide bolts.

## APPLICATION USE

Best grilles doors are designed for ease operation and long life use with minimum maintenance. Grilles offer security, protection and ventilation. Grills provide the ability to visually observe what is behind the door when fully closed. This security grille is ideal for store fronts, malls, display cases, office windows, parking garages and shopping centers.
